## PRO-ELECTRIC

As with all the Pro-Electric boilers, our combi range can be sited anywhere in the property, as no flue is required.

This is a direct replacement for a gas combi boiler and uses the same pipework and radiators.

It provides continuous hot water with flow rates of up to 7 litres per minute on the 14kw boiler, and has an integrated pump and expansion vessel.

The single phase versions of the combi boiler are ideal for smaller properties, such as flats and apartments.

In larger properties with multiple bathrooms, we recommend the larger combi boiler that uses the three phase supply (or the system boiler with a cylinder).
